

Photovoltaic Solar Panels

NFU Mutual

INSURANCE | PENSIONS | INVESTMENTS

Agent's Supplementary Questionnaire V3.2

Policy/Quotation Number		Renewal/inception date	
Name			
1. Manufacturer, make and type.			
2. Country of manufacture.			
3. a. Do the PV panels comply with IEC (International Electrotechnical Committee) standards for that type of panel?		Yes	No
b. are they Microgeneration Certification Scheme (MCS) approved?		Yes	No
4. Total value of PV Panels and associated equipment <i>(material damage only)</i>			
5. Where are the panels sited (roof, ground, etc)			
6. If roof mounted on how many separate buildings are panels sited?			
7. If roof mounted what is the construction of the buildings?			
8. If roof mounted has the policyholder obtained written confirmation from the installer or an architect, surveyor or structural engineer that the structure is capable of supporting both the panels and the extra stress of any heavy snowfall / windstorm?		Yes	No
9. If roof mounted have the electrics of the building been checked and are they up to date and in line with current wiring regulations?		Yes	No
10. If ground mounted what are the security arrangements/features in place? <i>(please provide details of any CCTV, alarms, fencing, method of fixing to the ground, etc)</i>			
11. Perils to be insured <i>(material damage only-If roof mounted cover should be no greater than that applying to the building)</i>			
12. Where is the inverter located? <i>(Is this in a structure of non-combustible construction and away from combustible materials?)</i>			
13. What is the maximum output?		kW	
14. What is the policyholder's expected annual turnover from the sale of electricity? <i>(including Feed-In Tariffs)</i>			
15. Have the PV panels been professionally installed by a Microgeneration Certification Scheme (MCS) installer?		Yes	No
16. Who is the installer?			
17. When were the panels first operational (or when are they expected to be)?			
18. Is a maintenance contract in force?		Yes	No
If not part of a Microgeneration scheme we need to know:			
19. Is a contract in force with the an Electricity company? <i>we should ask to see a full copy of the contract.</i>		Yes	No
20. Who connected the PV Panels to the National Grid?			
21. Has this been checked and signed off by a DNO / National Grid electrician/engineer?		Yes	No
22. Will the PV Panels be inspected annually and maintained by a qualified person with their own insurances?		Yes	No
Employers' Liability consideration			
23. Will the policyholder's employees carry out any work on the installation such as cleaning, or safety checks? <i>If yes what training have they received?</i>			
If Business Interruption is insured for the business we need to know:			
24. The availability of replacement parts.			
25. The availability of qualified persons to carry out repairs.
